

Sealing Solutions For the Oil and Gas Industry

The Advanced Products Company specializes in high integrity engineered Seals and Sealing Systems for the Oil and Gas Industry, particularly extreme environments, subsea, and down hole. The Company's resilient metallic seals and spring energized polymer seals are ideally suited for countless offshore applications. In addition, Advanced Products recently teamed with Cameron (a world leader in subsea oil and gas production and control equipment) to develop a sealing system for the HydraQuad® Subsea Coupler. As a major seal supplier for over 40 years, Advanced Products is a proud family-owned organization, with deeply rooted traditions of quality and service. The Company operates in a "Lean Enterprise" environment, holds ISO 9001 certification, and is dedicated to continuous improvement.

Gas
Industry

Products and Capabilities/Services...

- Machined and formed Metallic Seals up to 280" diameter
- Machined High Temperature Polymeric Seals that are available up to 80" diameter
- Machined High Performance Thermoplastic Seals and Rings up to 80" diameter
- Vacuum Heat-Treatment, Electro-plating:
(to NACE MR-01-075), FPI, X-Ray
- Turnkey Sealing System Design, Qualification and Production
- Solid modeling and linear/nonlinear FEA (to API 6A, 17D and ASME B31.3, ASME Section III, ASME Section VIII, standards)
